

ARCOT®

4 NEW PROTECTION ADDITIVES TO OVERCOME YOUR CHALLENGES

Thanks to a strong expertise in carbonation process, SEQENS is able to propose ARCOT®, a unique and innovative range of corrosion protection additives based on calcium sulfonates chemistry.

ARCOT® 4004R

ARCOT® 4004R is a calcium-based short-term metal protection rust preventative package for solvent and oil based formulations.

- Barium free
- Easy to handle
- Water displacing
- Interoperation, storage and transportation protection

ARCOT® NH 302

ARCOT® NH 302 is a new generation neutral calcium sulfonate based on highly refined base stocks for short-term metal protection.

- Barium replacement
- Good demulsifying and dewatering properties
- For protective oils (5 to 15%), hydraulic oils and slideway oils (0,1 to 5%), metalworking fluids (0,5 to 10%)
- Compatible with most solvents and oils

ARCOT® CS 203

ARCOT® CS 203 is solvent based polar overbased calcium sulfonate additive for a long-term metal protection.

- Outstanding performances in oil based formulations
- Non flammable
- Compatible with most hydrocarbon solvents and oils
- Protection of industrial gears and devices, automotive undercoating and cavity protection

ARCOT® CH 153

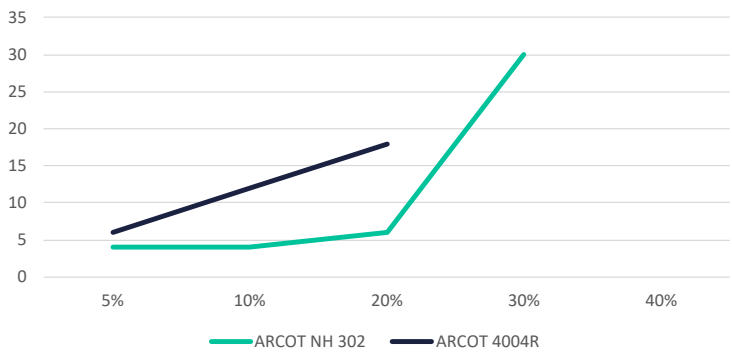

ARCOT® CH 153 is a new generation overbased calcium sulfonate based on highly refined base stocks for medium-term metal protection.

- Optimum performances in solvent based formulations
- Compatible with most solvents and oils
- Good resistance to water
- Protection of industrial gears and devices, automotive undercoating and cavity protection

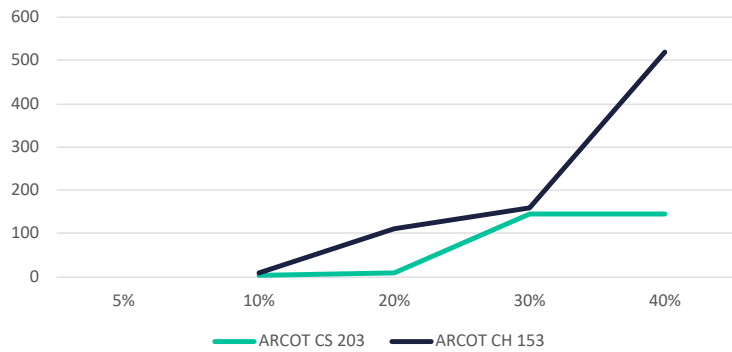

MAKE OUR CUSTOMERS FEEL SIMPLICITY WHEN WE
ADDRESS THEIR COMPLEX NEEDS

PERFORMANCE FOR PROTECTION APPLICATIONS

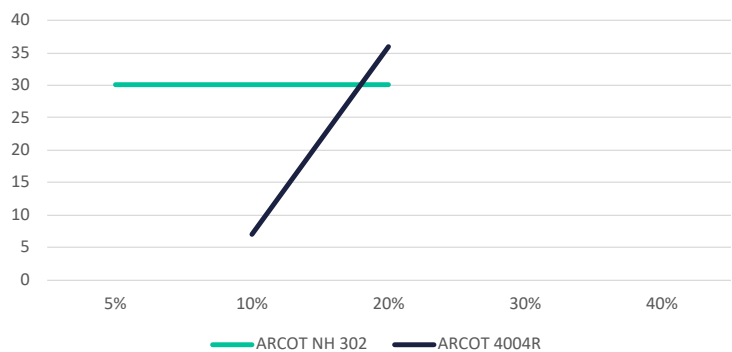

Salt Spray test in D60 solvent in hours (ASTM B 117)

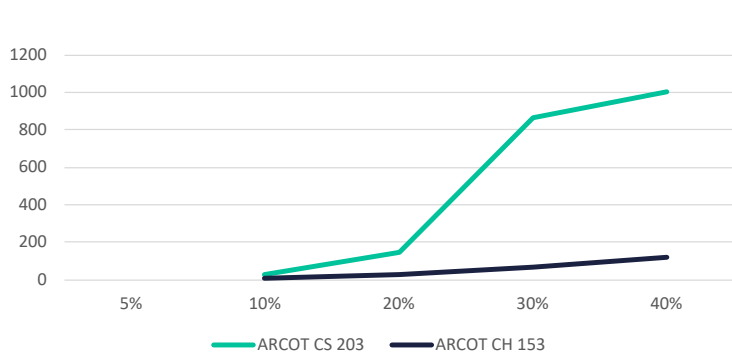

Salt Spray test in D60 solvent in hours (ASTM B 117)

Salt Spray test in SN100 mineral oil in hours (ASTM B 117)

Salt Spray test in SN100 mineral oil in hours (ASTM B 117)
